EDUCATION

Drexel University

Philadelphia, PA

Bachelor of Science in Computer Science, Minor in Data Science

Expected 2028

- **Relevant Coursework:** Data Structures, Systems Architecture, Discrete Mathematics, Software Design, Artificial Intelligence

EXPERIENCE

Software Developer Intern

Mar. 2026 – Sept. 2026

Ethos Lab

Philadelphia, PA

- Built and deployed **10+ REST API** endpoints using **Node.js**, **Express.js**, and **MongoDB** to support core application functionality and data operations
- Optimized **MongoDB** schemas and database queries to improve query performance and ensure efficient data retrieval across the application
- Designed and implemented a custom local file storage system to replace **Amazon S3**, providing an application-specific solution for managing uploaded files
- Automated **30+ API tests** to improve backend reliability, achieving a **17%** improvement in test accuracy by catching and resolving bugs pre-deployment

AI Trainer

May 2026 – Aug. 2026

Handshake AI Fellowship

Remote

- Completed **200+ LLM evaluation tasks** to benchmark model reasoning and technical accuracy
- Reviewed AI-generated responses in **computer vision** and **image processing** for accuracy and clarity

AV Support Assistant

Mar. 2025 – Sept. 2025

Drexel University

Philadelphia, PA

- Supported **4+** Media and IT professional staff in maintaining smooth classroom technology operations across **80+ classrooms** across campus
- Responded to **8-10 classroom support calls** per week, performing basic A/V repairs and delivering adapters, cables, and backup equipment to minimize instructional downtime
- Handled daily A/V support phone calls, documenting **60+ incidents** in the ticketing system and collaborating with senior technicians for escalations

PROJECTS

Banking System | *Java, JUnit, CI/CD*

Sept. 2025 - Dec. 2025

- Developed a **banking system** using **Test-Driven Development (TDD)** to implement and validate core banking functionality
- Created and executed **300+ automated test cases**, achieving **93% test coverage** and **93% mutation coverage**
- Integrated **CI/CD pipelines** to automatically build and test code changes throughout the development lifecycle
- Maintained **90% code quality** through automated quality checks, testing, and code refactoring

AI Children Book Generator | *React, Neon (PostgreSQL), Gemini API*

Dec. 2024

- Crafted a full-stack web application using **React** for the frontend and **Neon and PostgreSQL** for the backend
- Integrated Google's **Gemini AI API** to generate custom children's stories based on user input
- Designed and implemented a **Neon database** schema to store and track user-submitted data and generated content

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, C, SQL, HTML, CSS

Frameworks & Libraries: React, Next.js, Express.js, Node.js, Material-UI, Tailwind CSS

Databases: MongoDB, PostgreSQL

Developer Tools: Git, GitHub, GitLab, Postman, VS Code, IntelliJ, Bash, Linux
